Date: 10 June 2025

Task: Identifying and Fixing Common Website Bugs

Prepared by: Sneha Shekhar Kalyankar

Course: 3rd Year Diploma in Computer Engineering

Institute: Y. B. Patil Polytechnic, Akurdi, Pune

Sr. No.	Website Name	Bug Description	Suggested Fix
1	Amazon	Cart count is not updating after adding items	Implement centralized state management such as Redux to ensure consistent cart state across components.
2	Instagram	New message notification appears even after reading messages	Update the backend read status immediately and sync with the frontend using real-time tools like WebSockets or polling.
3	YouTube	Comments are not loading properly	Improve or fix lazy loading implementation to ensure comments load when the user scrolls or clicks.
4	Flipkart	Page re-renders unnecessarily when clicking on a product	Optimize component rendering using memoization or proper key usage in React to avoid full page reloads.
5	MSBTE	Website not loading	Possibly due to server downtime or DNS issues; ensure proper hosting.

			server response, and check domain configuration.
